

## No Acoustical Consultant on Staff? Let Air Flow and Price be Your Acoustical Consultant

Acoustic issues can be challenging to address on the front end. Naturally, it's far better to address it before you have a noise problem. Acoustic path analysis is time consuming, especially if it's your first time doing it.

### How can we help you?

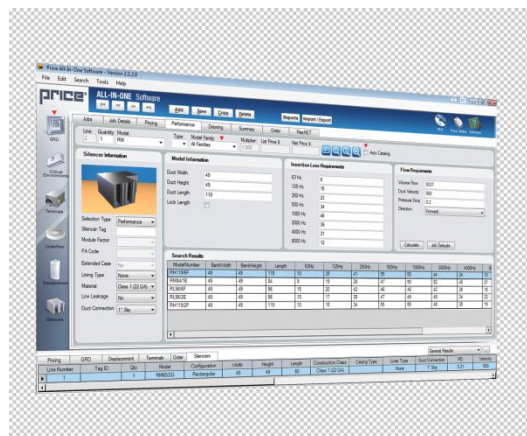

1. Full acoustical analysis on specific sound paths.
2. Straightforward silencer selection.
3. Custom shape and heavy housing silencer selections.
4. Sound enclosure drawings, performance and recommendations.
5. Terminal units with integral silencers.
6. Fan coils with integral silencers.

### How to Learn More about Acoustics?

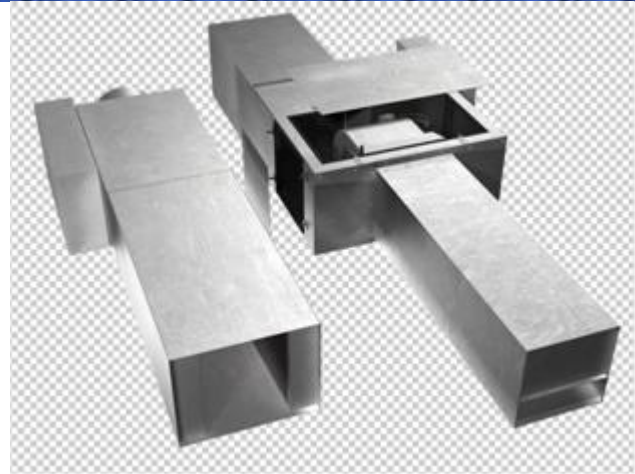

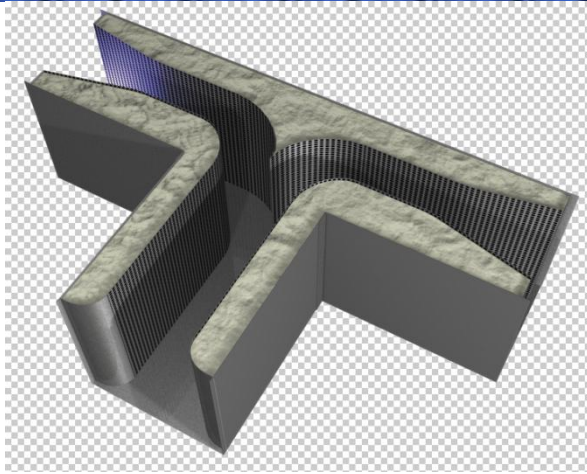

Learn more about acoustics from [Price's online training module.](#)

### Want to pick your own?

Download Price's [All-In-One software](#) and use the silencer ranking tool.

Price is relatively new to the acoustical market. It might be surprising to know Price now offers a full line of [standard](#), [elbow](#), [packless](#), industrial, [lined](#), [terminal unit](#), and extended casing silencers. Price also manufactures acoustical louvers and tongue-and-groove sound enclosures.

Price has quickly developed their offering by building and certifying their own NVLAP acoustical laboratory.

Even if you are not sure if a silencer is required, we'll happily look at your application and provide recommendations to control your sound and your costs.

We're here to help. Air Flow's mission is to be your HVAC Equipment Supplier of Preference.
