

Keeping up with the constant changes in products and suppliers is a tough job on top of the important work you do. I don't know how you engineers and contractors keep up with it all! It's impossible to be an expert in everything, and we at Air Flow would like to help you.

We can provide your company with specific training on a variety of topics, from acoustic basics and laboratory controls to infrared heat and pricing software tools. Maybe you want more options for a specific product and want to check out a competing supplier. Maybe you need more information on displacement ventilation but don't know quite where to start. Or maybe you'd like to know if a passive chilled beam would work for an application you're working on right now. The team at Air Flow is here to provide you with information and training to answer your needs and help you continue succeeding.

System, Product, and Software Training

Concept Training	Product Training	Software Tool Training and Product Selection
Displacement Ventilation	Makeup Air	Cookware (Fans)
Chilled Beams/Radiant Cooling	Humidifiers	Cook Lab Fans
Industrial Ventilation	Dust Collection	Cook ERV Selection
Acoustic Basics	Industrial and Commercial Dampers	Price ADPI tool
ADPI and Comfort	Infrared Heat	Price Terminal Units (VAV)
Life Safety Basics	Air Curtains and Energy Savings	Price Chilled Beam Selection Tool
Air Flow Measuring	Fabric Duct Systems	Price Room Design Tool
Laboratory Controls	Displacement Diffusers	NEP Humidifier Selection
Isolation Room and OR Controls	Active and Passive Chilled Beams	Makeup Air Selection
Industrial Heat Recovery	Electric Starters	IEC Fan Coils
Commercial ERV	Variable Frequency Drives	
	Airedale Unit Ventilators	

Please check out the chart to find one or several topics you could use a refresher on and give us a call. If you have other information or training needs, please send me a note at tom@airflowinc.biz or call me directly at (414) 351-7744. We're here to help, get you up to speed, and get you back to your job.

Regards,
Tom Gelin
